

Dejan Ivkovski

Front-End Developer · React · Next.js · TypeScript

Skopje, North Macedonia | +389 70 389 483
ivkovski89@hotmail.com | github.com/Dekolvko

PROFILE

Front-End Developer with 9+ years of experience building web applications, specialising in React, Next.js and TypeScript. I started as a full-stack developer with Angular, Node.js and SQL, which gave me a solid understanding of the whole application flow, and I have led a front-end team. Today I lead front-end development of a white-label, multi-tenant logistics platform used by several courier companies. I care about clean, maintainable code, performance and interfaces people enjoy using, and I want to keep growing as a developer and as a mentor in a positive, ambitious team.

SKILLS

Frontend	React, Next.js (App Router, Server Actions, Server Components), TypeScript, JavaScript, Angular, RxJS, HTML5, CSS, SCSS
UI & Forms	Tailwind CSS, shadcn/ui, Radix UI, React Hook Form, Zod, TanStack Table, Recharts, dnd-kit
State & Data	Redux Toolkit, React Query, REST APIs, Socket.io, i18next
Maps & Documents	Leaflet, React-Leaflet, Leaflet-Geoman, pdfmake, SheetJS
Backend	Node.js, Express.js, MySQL, MongoDB, SAP SQL, XSJS, JWT
AI Tools	Claude Code in VS Code (AI-assisted development and refactoring), Claude Design (wireframes and UI prototyping)
Tools & Practices	Git, GitHub, Docker, Sentry, OpenTelemetry, Microsoft Azure, Jira, Scrum / Agile

EXPERIENCE

Koder | Front-End Developer01/2024 – Present

Front-end development of Accura, a white-label parcel-delivery platform used by multiple courier companies: three Next.js applications for customers, internal teams and public tracking.

- Accura Customer Portal · lead developer
- Led the rebuild of the customer portal, replacing the legacy React app: 7 order types, Excel batch import, parcel-locker ordering with an interactive map and time-slot booking
 - Implemented online card payments through a bank payment gateway, the full authentication flow and customer profile management
 - Delivered a complete UI redesign with dark mode, mobile support and 4 languages; one codebase built and deployed separately for each courier company
- Accura Manager · logistics admin platform
- Built order and client management with complex multi-step forms, live client search and bulk import, plus price-list and tariff authoring with a formula builder
 - Built finance modules (COD payouts, courier reconciliation, invoices and payments) and hub logistics (reception, auto-distribution, returns, entity sealing)
 - Developed live courier and delivery maps with polygon region drawing; integrated PKI token invoice e-signing (NexU) and card payments (SecurePOS); built SSO handoff from the legacy app
- Accura Track · public shipment tracking
- Migrated the app to the company-wide architecture and redesigned the tracking UI: status header, progress stepper, history timeline and an interactive hub map
 - Added linked-shipment and return-document tracking, payment preview and courier contact info; built multi-tenant theming for 6 brands in 4 languages (mk, en, sr, sq)
 - Upgraded the applications to Next.js 16, React 19 and Tailwind CSS v4, with monitoring through Sentry and OpenTelemetry
- Tech: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, React Hook Form, Zod, TanStack Table, Leaflet, Recharts, Sentry, OpenTelemetry, Docker

Seavus | Front-End Developer

10/2021 – 12/2023 · Skopje

- Led the front-end team: planned and estimated development, designed and improved the front-end architecture, and reviewed code

TF Bank · Swedish bank · 20 months

- Developed the front-end of an internet-based niche bank offering consumer banking and e-commerce solutions on a highly automated proprietary platform, built to scale across products, countries and currencies

P27 · 10 months

- Front-end development with React and SCSS in an Agile team, delivered on Microsoft Azure

Tech: React, TypeScript, HTML5, CSS, SCSS, Microsoft Azure, Jira

Semos Cloud | Full-Stack Developer

03/2017 – 09/2021 · Skopje

- Worked across the whole stack, from Angular front-ends to Node.js services and MySQL databases, including estimation, planning and architecture

SurveyRocks · client: SAP · 22 months

- Employee survey platform that delivers surveys and analytics to help HR teams and managers make decisions based on real feedback

JobPts · client: SAP · 25 months

- Employee recognition and rewards application with two parts: an admin center and a user app panel

Tech: Angular, TypeScript, JavaScript, RxJS, Node.js, MySQL, Git, Scrum

PERSONAL PROJECT

Ematija · social commerce app · source on github.com/Dekolvko

- Social and commerce app with live chat and notifications, where users post, comment, react and sell their own products

Tech: React, TypeScript, Node.js, Express.js, MongoDB, Socket.io, React Query, Redux Toolkit, Tailwind CSS, JWT

EDUCATION

Seavus Education & Development Center (SEDC) | Web Programming Full Academy

2016 – 2017

LANGUAGES & INTERESTS

Languages: Macedonian (native), English (professional working proficiency)

Interests: fitness, hiking, travel and long walks
